Founded in 1976

Art Materials Service, Inc. © 2009

Volume #30

THANK YOU FOR YOUR INTEREST IN AMS PRODUCTS!

Art Materials Service, Inc. (AMS) was founded in 1976 to provide reliable generic hardware to the aluminum picture framing industry. By 1985, AMS became the world's largest manufacturer of metal hardware to this industry with a reputation for high quality and fair prices. Our continually expanding primary product line consists of metal hardware to assemble, hang, and secure aluminum, wood and plastic picture frames. Other items in our line include self-locking protective corrugated corners, mounting materials, laminating films, wire, easel backs, and a growing selection of hand- and air-operated machines used for the installation of AMS parts.

Most prices are quoted as "**cost per thousand**" (or "**M**") parts.

In order to avoid problems with the decimal, remember that \$10.00/M parts = \$0.01/each part.

PLEASE NOTE: Minimum invoice value for domestic orders has been decreased to \$150.00. Orders under \$150.00 will incur a \$35.00 handling fee.

\$300.00 minimum order for exports.

If you require technical assistance, need an AMS distributor referral, or would like samples of AMS products, contact us:

- By Phone, Toll Free National: **888-522-5526** or Local: **732-545-8888**
- By Fax: **732-545-9166**
- Visit Our Website: **www.ArtMaterialsService.com**

Art Materials Service also has a **EUROPEAN DISTRIBUTION** center in Emmerich, Germany:

AMS Trading GmbH, Max-Planck-Str. 17, 46446 Emmerich, Germany

Phone: 49-(0)2822-91302-0 Fax: 49-(0)2822-91302-25 Web: www.AMS-Trading.de

TERMS AND CONDITIONS OF SALE

From day of shipment – Net 30 days – Upon approval by the AMS Credit Department. FOB Art Materials Service, Inc., warehouse. Not responsible for goods damaged in transit. All claims must be made within 5 days after receipt of goods. All prices are subject to change without notice. A 2% service charge per month on all balances over 30 days. Any costs sustained by Art Materials Service, Inc. in collecting delinquent accounts will become part of the total amount owed to Art Materials Service, Inc. Our liability shall be limited solely to the replacement or repair of defective material not meeting our specifications. Returns are only accepted when issued a return authorization number and packing slip.

SPECIAL PACKAGING

Most bulk items in our catalog can be bagged or boxed in a form to make their handling and usage easier for our customers. AMS can also produce custom packs of hardware. For example: 2 wire hangers, 2 screws, and a 24" coil of wire in a private labeled package. For an individual quote please contact our Customer Service Department.

**Due to ever-changing market conditions, our prices fluctuate often.
Please refer to our Web site or call to verify pricing.**

MADE IN THE EU

Single box prices apply to all less than full carton box quantities. Same size cartons can be assorted for quantity pricing.

AMS advises trying samples in your machine to insure proper fit and function before ordering.

Large cartons cannot be shipped via UPS.

Small Cartons shipped UPS incur \$1.50 extra packaging charge per carton.

MADE IN THE EU

Cartridge Wedges to Assemble Wood Frames

MADE IN THE EU

AMS now offer Original Cassese Cartridge Wedges. These stainless steel wedges are not glue coated to prevent jamming and other technical problems. Thus, the wedges can be lubricated to (1) protect against rust, (2) allow better penetration into wood, and (3) continuously lubricate inner-workings of machine and maintain its longevity.

Each cartridge has 275 wedges, each box has 40 cartridges (11,000 wedges), each master carton has 6 boxes (66,000 wedges).

Cartridge Wedges for Softwoods

Kwik Hangers for Foam Boards and Corrugated Backing

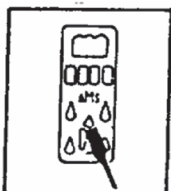

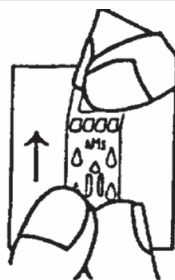

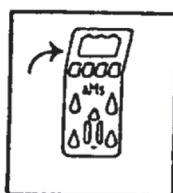

KH-1

AMS Kwik Hangers can be installed on foam boards or corrugated backings of various thicknesses. In order to prevent damage to artwork, do not use on boards less than 3/16" (4.8mm) thick.

Code	Plating	Qty / Box	1 - 5 CTN	6+ CTN	
KH1-5MK	Zinc	5000/carton	175.00	150.00	
<i>KH-1-5M</i>		<i>Price per 1000</i>	<i>35.00</i>	<i>30.00</i>	
			1 - 9 CTN	10 - 25 CTN	26+ CTN
KH1-1MK	Zinc	1000/carton	44.50	38.00	29.50
Bags of 100 hangers with directions printed on bag				1 - 19 BG	
KH1-1H		100/bag		10.00	
			1 - 5 CTN	6+ CTN	
KH1-1H20		20 bags of 100 hangers/box	128.00	100.00	

3 Easy Steps

1. Install hanger by pressing down and forward at the same time until it is flush against the board.
2. Bend back top of hanger 1/4" from object to hang picture.
3. If foam board is 3/16" or greater, press down on center anchor with flat end of screw driver to lock hanger in place.

Hinged Sawtooth Hangers for Mylar Frames and Backing Boards with Slots

MH-1

The AMS MH-1 Hanger has hinges that allow the sawtooth section to be easily bent for hanging on wall hook. These hangers have stabilizing legs to be used in one of two different fashions:

1. Slide legs between backing board and Mylar frame. (For best performance, the frame section engaging the MH-1 hanger should be affixed to the backing board.)
2. Or, extend sawtooth portion out from a slot cut into backing board while leaving the legs inside between frameload and backing board.

AMS "Hammer" Tools help install AMS Nailless Sawtooth Hangers into Softwood frames simply with the use of a hammer.

HAMMER-1 = \$84.00
HAMMER-2 = \$98.00

AMS Pneumatic Press

The AMS #AP-2 Press **enables quick installation of self-fastening hardware onto backing boards and wood frames.** Its work surface is made of a 12" x 18" (30cm x 46cm) steel plate that is 1/4" thick; a measuring tape is attached to the right and left edges. The press includes safety features of (1) a clear acrylic front guard, and (2) twin recessed buttons that activate mechanism only when simultaneously pushed by both hands of operator. A 2" (5.1cm) stroke is preset and needs no depth adjustment. Use magnetic die heads listed on next page.

The AMS #AP-2 Press runs via compressor at a recommended air pressure of 10-100 PSI (2.7 - 6.8 BAR) with a maximum force of 3610 LBS (1640 kgs) - 0.36 CFM. An adjustable pressure regulator and gauge are shipped with press, however a compressor is a separate purchase. Press dimensions are 19.5" x 18" x 17" (50cm x 45cm x 43cm); weight is 93 LBS (36.6 kgs).

Code	Description	Price
AP-2	AMS Pneumatic Press	
SG-1	Steel Guide for Air Press: This 42" (1.07M) long work surface fence is used as an easily adjusted depth stop in conjunction with the ruler tapes supplied with the table. It is also used as a lateral parts positioner when working with the stops included.	
PVS-1	Pivoting Flip Stop: Used with the steel guide to allow additional positions for part installation.	

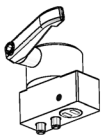

AMS Hand-Operated Toggle Press

The AMS #HP-2C Hand-Operated Toggle Press **enables quick installation of self-fastening hardware.** It is user friendly, light weight and can be shipped via UPS. Hardware is affixed to backing boards with the help of left and right centering guides. Use magnetic die heads listed on next page.

HP-3C32	Easel Hinges - K17 - Use with HP-3C1	78.00

Z- Bars for Heavy Frames

The EZ Bar System is designed to hang art, mirrors, cabinets and other heavy objects. Two bars are needed per frame: One for the wall and one for the frame. Height dimension for all bars listed here is 1-1/16" (2.7cm).

How to Use

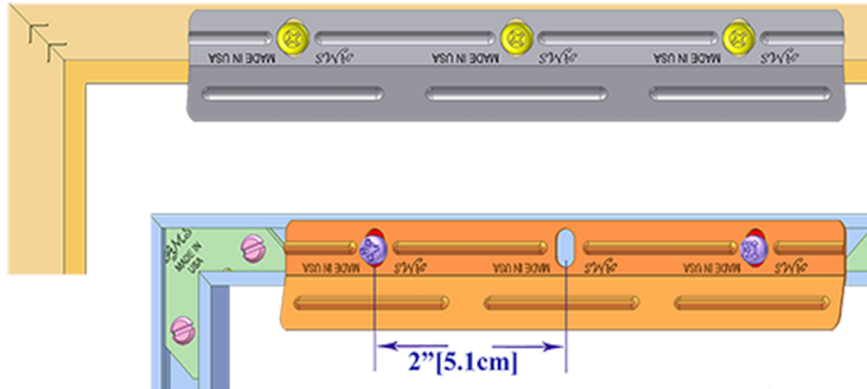

1. Attach one bar along the **TOP** of the frame. Recommended screw for attaching first bar onto frame. (AMS# F1215 size #6 x 1/2" phillips head.)
2. Determine placement on the wall using a level to ensure the frame will hang correctly. Use wall anchors to secure the second bar with screws onto the wall. (AMS# F1228 size #8 x 1" phillips head with AMS# 555-3A anchor.)

Note: For security, you can add and AMS Mounting Bracket on to the bottom center of the frame and affix it to the wall using an AMS Locking T-Screw.

Heavy Duty Steel Sawtooth Hangers Attached with Nails

All AMS Steel Sawtooth Hangers have a little dimple exactly in the middle of the hanger making it easy to hang a picture at the correct position on the wall. First attach hanger to frame and then position the framework on the wall. When satisfied with position, push frame firmly in place and pull away. A small spot rubbed from the sawtooth hanger's dimple will show where a wall hanger should be nailed into wall. **See AMS Nail and Staples for attaching hardware.**

Flush Mount Hangers for Heavy Frames and Mirrors

AMS Flush Mount Hangers consist of two parts: One half (FM1) is attached to the wall with the security spring clip facing upward and the other half (FM2) is attached to the frame. These two pieces interlock when the frame is hung on the wall -- which insures a strong hold with security mechanism for heavy frames and mirrors. Dimensions of hanger: 1.7 x 1.6" (42.3mm x 40mm).

FM2 can be used both on the frame and on the wall when the security mechanism is not required.

Code	Description	Qty / Box	1 - 4 BX	5 - 9 BX	10+ BX
FM1	With security spring clip; Attach to wall	1000/box		Call for quote	
Recommended screw for frame: #6 x 5/8" or 1/2" with countersunk head (AMS #F1418 or #F1417)					
FM2	No security spring; For frame and wall	1000/box	350.00	323.00	280.00
Recommended screw for wall: #8 x 1" (AMS #F1228) with AMS #555-3A wall anchors					

ONE-PIECE RING HANGERS FOR WOOD AND PLASTIC FRAMES

One-piece Ring Hangers

0-1-A

AMS One-piece Ring Hangers have an extruded O-shaped opening with no sharp edges cutting wire. Bend up to receive wire and re-flatten. Fasten with nails (AMS # N18X0381M).

Code	Plating	Qty / Box	1 - 14 M	15+ M
O-1-A	Zinc	15,000/box	19.00	14.00

Polybags each containing 2 Hangers and 2 3/8" Nails

O-1-A-P-1	Zinc	2000 bags/box	Call for quote.	
-----------	------	---------------	-----------------	--

0-1-B

AMS One-piece Ring Hangers have an extruded O-shaped opening with no sharp edges cutting wire. Bend up to receive wire and re-flatten. Fasten with screws. Recommended screws AMS #1213 or AMS #F1215.

Code	Plating	Qty / Box	1 - 5 CTN	6+ CTN

Code	Plating	Hangers per Bag	1 - 5 Bags	6+ Bags
M1709-2M	Nickle	2000	137.00	97.25

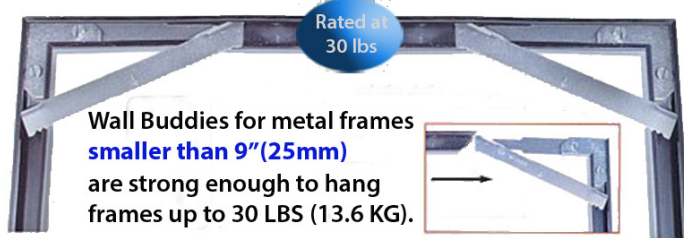

Wall Buddies -- Self-Leveling Picture Hangers

Wall Buddies for frames **larger than 9 inches (25mm)** are strong enough to hang frames up to 80 LBS (36 KG).

Wall Buddies for frames **smaller than 9" (25mm)** are strong enough to hang frames up to 30 LBS (13.6 KG).

Wall Buddies for metal frames **smaller than 9" (25mm)** are strong enough to hang frames up to 30 LBS (13.6 KG).

These sturdy zinc-plated sawtooth hangers are screwed onto the upper corners of frames. Hanging frames level is made simple and quick with Wall Buddies, even when wall hangers are placed unevenly. They also help create a stronger join on the upper corners. Depending on the depth of the moulding, these hangers can be affixed upside down to ensure that the frame hangs flush against the wall.

Recommended screws AMS #F1207 or AMS #F1204 to be purchased separately (see page 35).

3 variations are available:

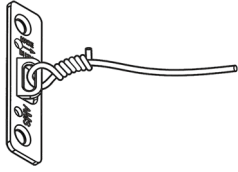

1. Wood frame hangers for large or wide frames up to 80 LBS in weight.
2. Wood frame hangers for small or narrow frames up to 30 LBS in weight.
3. Metal frame hangers to slide under the tapped angle corner during assembly.

Sold per thousand left + right sets (M sets = 1000 sets).

25 sets in a pack; 40 packs per box; Enough hangers in a box to hang 1000 frames.

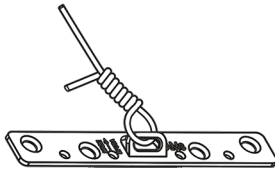

Code	Frame type	Screw not included	1 - 2 M sets	3+ M sets

WBM2200	Metal -- Clark, Nielsen, Designer -- up to 30 LBS (13.6 KG)			

Super Steel Hangers -- New Design allows use on Narrow Frames

AMS **Super Steel I Hangers** are one-piece wire hangers with **two holes**, one above and one below the wire attachment ring. This creates a very strong wire hanger and reduces the problem of hangers pulling out of frame -- especially frames made of soft mouldings. These hangers are made in the USA to insure strength and smooth center ring with no sharp edges. Recommended screw size: #4 x 1/2" (AMS #F1409).

Code	Qty / Box		1 - 4 CTN	5 - 10 CTN	11+ CTN
SSI-2500	2500/box		207.50	158.50	147.50

Please call or E-mail AMS Customer Service for more information.

Friction Sawtooth Hangers

FH-1

AMS Friction Sawtooth Hangers are pushed over backing board without screws or nails. The groove on the bottom of these hangers enable usage with gallery display system hooks. Use Soft Steel on frames no larger than 16" x 20" (40cm x 50cm). Use Hardened Steel on large, heavy frames with 2 hangers attached near each top corner.

Soft Steel -- Black Plated		Qty / Box	
FH-1SB-2MM	0.08" (2mm)	10,000/box	Call for quote
		<i>Price per box</i>	
FH-1SB-3MM	0.12" (3mm)	10,000/box

		<i>Price per box</i>	

Friction Wire Hangers

FH-2

AMS Friction Wire Hangers are pushed over backing board without screws or nails. Attach two hangers to backing board -- one on the left and one on the right side. Twist wire or cord through the rounded hole and push hangers to proper position. **Dimples keep hangers from sliding.**

MADE IN THE USA

Standard-Fire Flexi Tab Tool

The AMS Standard-Fire Flexi Tab Tool inserts one Flexi-Point or Rigitab per press of trigger into wood mouldings to quickly clip frame load into frame. The nosepiece is designed to allow Flexi-Point insertion almost horizontally. After firing, just slide the tool over to the next point of insertion rather than lifting away from frame for speed and efficiency. Tabs are inserted at an angle, which means they need to be pressed down to complete assembly. This tool is lightweight and can be loaded quickly without change of work position.

Code	Description	1 - 5 EA	6+ EA*
SFLX1	Standard single-shot tool	375.00	345.00

Flexipoints and Rigid Points -- Standard 5/8" (15mm) length

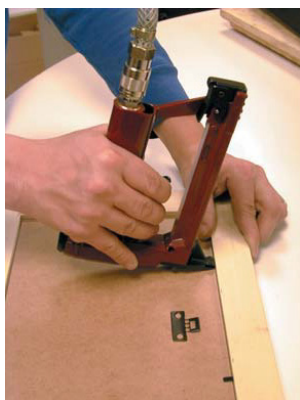

AMS Standard Flexi- and Rigid-Points can be used with SFLX1, SFLX2 and other standard Flexi-Tab Tools to clip frame load into backloaded frames. Dimensions are 5/8" (15mm) long, 3/16" (5mm) wide and 0.015" (0.35mm) thick.

Jumbo-Style Pneumatic Flexitool 1" (25mm) --- NEW !!

MADE IN THE EU

This exclusive pneumatic Jumbo-Style Flexitool uses 1" (25mm) flexipoints:

- Economical: A single 1" (25mm) flexipoint can replace 4 regular 15mm flexipoints
- Lightweight and easy to slide along moulding
- Ideal for big frames, mirrors or poster frames
- Extreme reliability proven by framers worldwide
- Ideal for medium and contract framers

Pneumatic Staplers

AMS Staples listed on next page.

AMS Air-Powered Staplers are light weight (0.6 kg) and durable. A special modification developed by AMS ensures that these **staplers will not cut canvas or crush boards**. Cartridges of staples are reloaded quickly within seconds. Each stapler is offered with or without a front spacer (nose plate) which turns it into a fitting tool. **Use AMS Staples** listed on next page. See AMS Workstations and AMS Air Compressors.

MADE IN THE EU

The AMS Standard Stapler is **available in three variations** for affixing staples of crown widths 3/8" (10mm), 3/16" (4.4mm) or 1/2" (12mm).

These staplers are **used to fasten materials that are flush**. For example, they can quickly clip corrugated corners as well as attach canvas artwork to frames when stretching by hand.

The **AMS #S100 Narrow Crown Stapler** is particularly **useful for attaching sawtooth hangers and door easel backs onto frames**.

Code	Description	AMS Staple Code	1 - 5 EA	6+ EA*
S200	Stapler - 3/8" (10mm) regular crown	S2 / 32	275.00	245.00
S201	Nose plate to change S200 into fitting tool	S3 / 31	Call for quote	
S300SB	Stapler - 1/2" (12mm) wide crown	S3 / 31	Call for quote	
S100	Stapler - 3/16" (4.4mm) narrow crown		Call for quote	

Pneumatic Fitting Tools

The AMS Fitting Tool is a stapler with a special nose plate attached to ensure that **staples are not driven completely into framing materials**, which means the staples are kept extended about 50% above the installed surface. This tool is helpful when inserting staples to hold frameloads into backloaded frames (an inexpensive alternative to a Flexible Tab Tool).

AMS S200 Staplers can be transformed into Fitting Tools with the addition of a special front spacer or nose plate (AMS Code #S201).

Code	Description	AMS Staple Code	1 - 5 EA	6+ EA*
S200A	Fitting Tool - 3/8" (10mm) regular crown	S2 / 32	330.00	305.00
S101	Fitting Tool - 3/16" (4.4mm) narrow crown		360.00	325.00

For over 30 years, AMS has proven quality control standards to guarantee customer satisfaction.

AMS Self-Locking Protective Corners

Made in the USA

AMS protective corners **have tightly locking tabs** to ensure a fit that will not result in corners popping off of frame -- **no tape or staples required**. These **white-faced** corners are **made from sturdy corrugated stock** and are **stripped of waste** to keep work areas clean and efficient. For over 20 years, AMS has offered the most **consistent quality control** on protective corners for picture frames.

Two types of protective corners are available:

- (1) Adjustable-height corner formats to fit most frames, and
- (2) Single-height corner formats for volume applications using frames with the same depth.

MADE IN THE USA

ADJUST-I

ADJUST-I adjustable-depth corners fold to lock over mouldings and cover 4 inches X 4 inches (10.16 cm) of the frame corner length with three adjustable depth (or height) dimensions of 1/2 inch (1.27 cm), 1 inch (2.54 cm) or 1-1/2 inches (3.81 cm).

186-SHIP

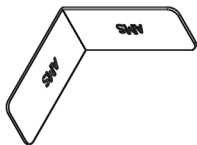

The AMS system for shipping framed art using 186-SHIP corrugated corners is simple and quick. Just staple one 186-SHIP corner onto a backing board and slide frame in. Then staple three more 186-SHIP corners on around frame to hold artwork into place during transport. Scores on the legs of the 186-Ship may be varied to use on many different frame heights.

These corners are natural kraft in color. Dimensions cover 3-7/8 inches x 3-7/8 inches (8.5 cm) frame leg length and 1-1/4 inch (3.18 cm) frame depth (or height).

MAT-II

MAT-II are galvanized steel corners used to reinforce mat board shipping cartons and protect mat boards from being damaged during transport. Their corners have been scored and rounded for a clean, yet safe 90-degree bend. One box contains enough corners to protect 22-25 sheets of mat board.

Item	Size	Qty / Box	Price / Box
